DR Hub: Emergency Energy Settlement Task

- CSP goes to each emergency energy settlement and:
  - Adjusts up to the first 3 settlement hours associated with the notification time of the registration, as applicable.
    - **Any hour that contains 30 minutes or more from the start of a Load Management event *cannot be deselected***
    - DR Hub default is that all load management registrations began reductions when notified
    - If the registration did not start load reduction when notified (notification time), then CSP should deselect settlement hours as appropriate
    - **Ensure all selected settlement hours are one contiguous block***

De-selecting Notification Time Hours

- PJM allows the CSP to de-select hours only if the site has not started to reduce *during the notification period*.
  - For QUICK lead (30 min): de-select the first hour. Cannot de-select the first hour if the event start time is *on the hour*.
  - For SHORT lead (60 min): de-select first or second hour, depending on notify time.
  - For LONG lead (120 min): de-select first, second, or third hours depending on notify time (must be contiguous – if the 2nd hour is de-selected then so must the 1st hour).

No other hours at the start of an Emergency Energy Settlement are allowed to be de-selected.

Examples

	Quick 30	Short 60	Long 120
Description	1 hour may be deselected. No hours may be de-selected if the notify time is on the hour (14:00).	De-select up to1 hour if notify time is ***before*** the 30 minute mark. If notify time is ***after*** the 30 minute mark, up to 2 hours may be deselected.	De-select up to 2 hours if notify time is ***before*** the 30 minute mark of the first hour. If notify time is ***after*** the 30 minute mark of the first hour, up to 3 hours may be deselected.
Examples	Notify: 14:15 Start: 14:45 De-select HE15 --- Notify: 14:00 Start: 14:30 Cannot deselect HE15	Notify: 14:15 Start: 15:15 De-select HE15 --- Notify: 14:45 Start: 15:45 De-select HE15, HE16	Notify: 14:15 Start: 16:15 De-select HE15, HE16 --- Notify: 14:45 Start: 16:45 De-select HE15, HE16, HE17

De-selected hours must be contiguous, do not select one and then de-select the next

De-selecting *Release Time* Hours

- Any hour less than 30 minutes at the end of a Load Management event may be deselected by the CSP.

- Example: Event release time 21:15
  - HE 22 may be deselected
  - That hour would not be used for compliance, and therefore *may* be deselected by the CSP for emergency energy settlement.

Deploy All Resources Action (DARA)

- *In the rare instance of a DARA, the de-selecting of notification hours may change as the Load Management event start time is updated coincident with the DARA.*

	Quick 30	Short 60	Long 120
Description	1 hour may be deselected. No hours may be de-selected if the notify time is on the hour (14:00).	De-select up to1 hour if notify time is ***before*** the 30 minute mark. If notify time is ***after*** the 30 minute mark, up to 2 hours may be deselected.	De-select up to 2 hours if notify time is ***before*** the 30 minute mark of the first hour. If notify time is ***after*** the 30 minute mark of the first hour, up to 3 hours may be deselected.
Example:	Notify: 14:15 ~~Start: 14:45~~ **DARA Start: 14:25** ~~De-select HE15~~ **No De-selection** --- Notify: 14:15 Start: 14:45 **DARA Start: 15:05** De-select HE15 **No Impact**	Notify: 14:15 ~~Start: 15:15~~ **DARA Start: 14:25** ~~De-select HE15~~ **No De-selection** --- Notify: 14:15 ~~Start: 15:15~~ **DARA Start: 15:05** De-select HE15 **No Impact**	Notify: 14:15 ~~Start: 16:15~~ **DARA Start: 14:25** ~~De-select HE15, HE16~~ **No De-selection** --- Notify: 14:15 ~~Start: 16:15~~ **DARA Start: 15:05** ~~De-select HE15, HE16~~ **De-select HE15**

*Exception to Contiguous Hours Rule

- In the rare event of two Load Management events in the same day, a Load Management registration will have two emergency settlements to complete. Each event should follow the guidance herein but there will be a ‘gap’ in the settlement hours due to multiple events.
