

PC Special Session: Storage as a Transmission Asset Monthly Progress Report

7/20/2020

1. Storage as a Transmission Asset (SATA)

Issue Status

The PC Special Session: Storage as a Transmission Asset (SATA) is currently in the interest identification and design component phases.

Target Completion

12/31/2020

Progress Update

The group's second meeting was on July 6, 2020 and it began with a work plan review and education on incorporation of SATA in planning studies and FERC precedent. Then, the group began identifying interests and design components. The next meeting will continue interest identification and design component development. They will also begin documenting the relative importance of design components and developing options for each design component.

Action Requested (if necessary)

Stakeholders are asked to submit any interests and design components for inclusion in the matrix or bring forward interests or design components to the next meeting on 8/4/2020
