

Residential Demand Response participation in the PJM Ancillary Services - Synchronized Reserve Market

Problem / Opportunity Statement

- Demand Response is a capable Synchronized Reserve resource. Aggregations of residential demand response customers could potentially be a synchronized reserve resource. Today, the requirement to install, maintain and store the 1-minute metering infrastructure that is required to participate in that market is cost-prohibitive.
- The situation to be improved

The ability of residential demand response customers to participate in the ancillary service market, particularly, the sync reserve market.

Document if the new work is to address specific technical issues and/or to address broader policy issues
This issue is purely a technical.

Issue Source

Enerwise, an energy services company and a CSP registered as a PJM market participant is bringing this issue forward. Enerwise through its parent company, Comverge, is the leading provider of residential demand response services.
