

Manual 20 – Revision 12

PJM Resource Adequacy Analysis

Jason Quevada
Resource Adequacy Planning
Markets & Reliability Committee
July 28, 2021

What's in this update?

- Periodic cover-to-cover changes
- The proposed revisions are intended to
 - Clean up outdated and/or redundant language
 - Ensure language follows current processes
 - Correct grammar, spelling, punctuation, consistency of terms and document references

- Section 1.2: Removed RPM Timeline (this resides in M18)
- Section 1.4: Clarified language, eliminated redundant text
- Section 1.6: Clarified language
- Section 1.8: Eliminated unnecessary language. Updated to reflect that there are new LOLE tools
- Section 1.9: Clarified language
- Section 3.2: Clarified language around definition of the World. Clarified language around time period used in the creation of Load Model and some aspects of Capacity Model. Eliminated unnecessary language.

Impacted Subsections

- Section 3.3: Added some clarifying language. Eliminated unnecessary language.
- Section 4.3: Updated a link. Eliminated unnecessary language.

- The changes to Manual 20 as a result of the ELCC implementation (Revision 11) are currently being discussed at the MRC.
 - Such changes are in Section 5 of the manual
 - First read was at 06/23 MRC
 - Endorsement request will occur at the 07/28 MRC
- The documents posted as part of the periodic cover-to-cover review (Revision 12) for this PC meeting **do not show** the ELCC changes in redline
 - By the time the PC votes on Revision 12, the outcome of the ELCC changes at the MRC will be known and Revision 12 will reflect such outcome.
