

FERC/NERC January 2018 Extreme Cold Weather Event Report: PJM Recommendation Review Summary

Alpa Jani
Sr. Consultant
Operating Committee
January 9, 2020

- The Report Included 13 Recommendations Based on the Following Topics:
 - Generator Cold Weather Reliability
 - Situational Awareness
 - RC-to-RC Communication
 - Transmission Operations
 - Seasonal Studies
 - System Operating Limits
 - Reserves
- The PJM teams reviewed the report and 12 of the recommendations have no further enhancements or process changes
- The Generator Cold Weather Reliability recommendation review supported the development of the Weather Operating Limit Survey in eDART (12/2/19-4/1/20)
