PJM Operating Committee (OC)

Re: Illinois CEJA Reliability Guidance

PJM Members:

This message is primarily for Illinois resource owners and operators. PJM has been working closely with representatives of Illinois government, including the Illinois Environmental Protection Agency, on the development of reliability guidance pursuant to PJM's articulated role in the Illinois Climate and Equitable Jobs Act (CEJA).

PJM has received input from the IMM and Illinois regulators. PJM is also sharing a draft of this guidance with PJM members to allow the affected Illinois generation operators to provide operational feedback to PJM on this document with a focus on operational procedures.

PJM will provide an additional update to stakeholders at the next Operating Committee (OC) meeting on Feb. 10. PJM is encouraging any feedback on operational issues prior to the OC discussion, but no later than 5 pm, Thursday, February 10, 2022. The intent is to work with the IL EPA to publish a final version as soon after the OC meeting as possible.

Sincerely,

Michael E. Bryson
