

# Data Management Subcommittee 8/24/17 Meeting Update

Andrew Ford  
DMS Chairman, Model Management  
OC  
September 12, 2017  
DMS\_Officers@PJM.com

## 1. DMS-Joint topics

- Transition to Data Miner 2 for all data needs.
- Performance Assessment Hours (PAH) over ICCP and DNP, recent Capacity Performance project.
- Update on passing last good RT telemetry data to members.
- DMS Survey Results: General Satisfaction poll (15 questions).
- ICCP Data Link Report for May, June, July.
- Synchrophasor Review : Update on 7/13/2017 special meeting.

## 2. DMS-Confidential

- A. **Winter Projects on-time submission due date was 9/1/2017.** No concerns noted in TO review. Fall Build on target for September 12, 2017 implementation.
- B. **Tie Line Process.** Summary Chart showing all known forth coming tie lines was reviewed.
- C. **Eastern Interconnect Data Sharing Network (EIDSN) Data Sharing and Tools Working Group (DSTWG) Update.**
- D. **PJM Cut-In Process enhancements .** Enable PJM staff preparations for new facilities to be energized before TO calls to energize equipment. Processes address one-week-out, two-day out, and day-ahead timeframes.

## 2. DMS-Confidential

### E. RoundTable – dialog between members and PJM staff

- i. TO experience with electronically exchanging data using secure methods is valuable.
- ii. The telemetry update discussion indicated that TO staff can request external region GO data and requested quarterly TO ICCP dumps.
- iii. External region modeling data can be shared via eDART and SharePoint. Weekly ICCP additions are distributed too.

### F. Ratings Update

- i. Resolving discrepancies between Planning and Operations databases at PJM
- ii. Assist with Monitored Priority (MP) assignments and identifying needed ratings.

## 2. DMS-Confidential

### G. Planning RTEP and Generation Queue Activities

- i. Spreadsheet details provided of projects related to the Winter Build (Item A).
- ii. Network Model submissions need entry of RTEP/Queue number for coordination.

### H. TO Staff Presentations

- i. NATF update: Wind Plant and Distributed Energy Resource (DER) Modeling
- ii. PPL staff Experience with Implementing New Flow Breaker Capability
- iii. Alstom Telemetry Processing in PJM Data Exchange

TO staffs encouraged to present on their telemetry processing and Cut-in process (Item D).
