

# Resilience for Operations

Glen Boyle  
Manager, System Operator Training  
Operating Committee  
September 12, 2017

## PREPARE

Generator Attributes  
(Frequency Response)

## OPERATE

Contingency Screening  
and Monitoring

## RECOVER

Black Start (cranking  
path evaluation)

- Primary Frequency Response Senior Task Force first meeting July 2017, with targeted completion March 2018.
- Operations staff has solicited member feedback on the current RTO – Wide Black Start RFP process via Committee Structure. RTO Wide RFP Issuance, Evaluation and Award process will occur during the calendar year 2018. Possible M14-D changes with committee approval.
- Operations staff reviewing Extreme Event Contingency Analysis initially focus on operationalizing gas pipeline failures as part of PJM contingency set. Evaluation includes impact on Transmission System and Reserves. Gas Pipeline contingencies details at the October OC.
