

Manual M-13 rev. 65

SOS, OC, MRC

Chris Pilong, Dispatch

- Periodic review
- Section 1.3 Additional language added to the communications section to include references to communications with neighbors
- Deleted Sections 1.3.1, 1.3.2 and 1.3.3 due to redundant information being included in Manual 1.

- Section 2.2: Updated the annual DASR to 5.29% for 2018
- Section 2 and Section 5 updated to provide clarity regarding the emergency procedures that trigger a Performance Assessment Hour (PAH)
- Sections 2.3.2, 5.2 and 5.7 included notes to indicate which emergency procedures would trigger a Performance Assessment Hour (PAH).

- Section 3.4: Hot Weather Alert. Added language e to indicate an Alert can be issued at temps below 90-degrees during the spring and fall months depending upon impacts of generation and transmission outages that lower available capacity.
- Revised all references to the FERC pager system to the FERC email address to be utilized for capacity deficiency notices
