

AGENDA
PJM Interconnection
Small Generation Interconnection Working Group
Wyndham Hotel
Wilmington, DE
February 24, 2005
10:00 AM to 3:00 PM

1. OBJECTIVE

Develop an interconnection technical standard for generators 2mw to 10mw, for both network and radial services applications.

- A. Update on the 2MW standard
- B. Presentation by DOE on their activities and progress in establishing a national program on equipment pre-certification
- C. Begin to review the existing 2MW standard and review its applicability for the 2MW to 10MW size range in both network and radial service applications.
