

TrAIL Project Completion Notice:

This message is to provide notification that the third and final section of the TrAIL project, the 502 Jct-Mt Storm 500kV line, has been energized this morning (5/19/2011). As indicated at past Committee meetings, the APSouth interface definition has been updated to include the Mt Storm – Meadow Brook 500kV line section. Also as indicated in past Committee meeting presentations, we have seen a significant increase in operating margin on the APSouth interface. All flow and limit changes can be seen on the eData webpage (<https://esuite.pjm.com/mui/index.htm>)
