Advanced Technology Pilot Program

Prequalification Questionnaire

PJM Interconnection, L.L.C.
I. Introduction

This questionnaire is developed as a supplemental tool for PJM collecting information from the potential Advanced Technology Pilot project owner(s). The information gathered in this form will be used to evaluate the owner’s qualification for a pilot with PJM. We ask that you respond fully to each question and provide as much supporting documentation as possible, including company brochure, case studies, and white papers.

When we receive your response to this questionnaire we will conduct an evaluation and provide you our findings within 5 business days.

II. Identification:

- Company’s name, address and website:

- Brief introduction of your company (history, core business, etc.)

III. General Questions:

- Where do you hear about PJM’s pilot program?

- Why is your organization interested in participating in the PJM pilot program?

- Is your company (or your parent company) currently PJM member? Or do you intend to become a PJM member before/after the pilot project? Or are you providing technical solution(s) to a PJM existing member? If neither fits your case, please explain.

- To what extent are you familiar with PJM and PJM markets?
• What is the target PJM market (capacity, energy, ancillary services) in the pilot? Any specific reason?

• What is your expected date to start and end the project?

IV. Technical Questions:

• PJM’s pilot program focuses on enabling key technologies. Please provide a brief introduction on the technology that will be used in your pilot project and explain its innovativeness.

• Has the technology used in this potential pilot been commercialized anywhere? It would be helpful if there is a case study to share, but it is not required for initial screening.

• If your pilot project involves energy/capacity resources, please provide a brief introduction of the resource type and the geographical location (including utility territory) of the resources. If possible, please provide a resource profile.

• Please identify technical support/training that you may need from PJM to proceed.
