

FOR IMMEDIATE RELEASE

**PJM AGAIN NAMED TO COMPANIES
THAT CARE HONOR ROLL**

Fifth consecutive year PJM earns national award

(Valley Forge, Pa. – March 20, 2008) – For the fifth consecutive year PJM Interconnection, the electricity grid operator for 13 states and the District of Columbia, has been named to the nationally acclaimed Companies That Care Honor Roll for providing a supportive work environment and continued commitment to community service.

The recognition is given by the Center for Companies That Care, a Chicago-based organization dedicated to encouraging and celebrating businesses that prize their employees and are committed to community service.

In support of Companies That Cares' valuable work, PJM will participate in the "CAREDAYS08: Terrific Tales" campaign. This national initiative supports childhood literacy by providing age-appropriate books to classroom libraries with limited resources. Individuals and organizations will be encouraged to donate books or raise funds to purchase books for children to read. Companies That Care launched the campaign today.

"It is an honor to be named for the fifth consecutive year to the Companies That Care honor roll," said Karl Pfirrmann, PJM executive vice president. "PJM will live up to the spirit of the honor roll by providing a dynamic and respectful work environment as well as supporting employees who care about working for their communities."

PJM is one of only 41 U.S. companies named to this year's honor roll. Candidates for the honor roll are evaluated by employee survey data and an independent panel of seasoned business professionals. The complete list of companies recognized this year and additional information on Companies That Care is available at www.companies-that-care.org.

PJM Interconnection ensures the reliability of the high-voltage electric power system serving 51 million people in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia. PJM coordinates and directs the operation of the region's transmission grid, which includes 6,038 substations and 56,250 miles of transmission lines; administers a competitive wholesale electricity market; and plans regional transmission expansion improvements to maintain grid reliability and relieve congestion.
