PJM Launches New On-Line Issue Tracking Tool

(Valley Forge, Pa. – April 28, 2010) – A new tool to track various issues in the PJM stakeholder process is now available at issuetracking.pjm.com. This enhanced tool provides a one-stop-shop for stakeholders to access information about significant issues being considered by PJM stakeholders. The tool aids full stakeholder participation.

The Issue Tracking page displays the status, details and related documents on significant issues being vetted through committees, task forces and working groups.

Stakeholders are encouraged to provide feedback and suggestions for future enhancements via the link on the Issue Tracking Web page.

PJM Interconnection ensures the reliability of the high-voltage electric power system serving 51 million people in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia. PJM coordinates and directs the operation of the region's transmission grid, which includes 6,038 substations and 56,350 miles of transmission lines; administers a competitive wholesale electricity market; and plans regional transmission expansion improvements to maintain grid reliability and relieve congestion.
