PJM Hurricane Sandy Update
November 2, 2012, 3:30 p.m.

- PJM member companies continue making progress in restoring electric service to their customers. As of 3:30 p.m., Nov. 2, less than 1.9 million customers are still out of service, most in New Jersey and Pennsylvania.

- 68 bulk electric system facilities remain out of service in the PJM region. Three of four 500-kilovolt facilities that are out of service are expected to be back in tonight or Saturday.

PJM Interconnection, founded in 1927, ensures the reliability of the high-voltage electric power system serving 60 million people in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia. PJM coordinates and directs the operation of the region’s transmission grid, which includes 59,750 miles of transmission lines; administers a competitive wholesale electricity market; and plans regional transmission expansion improvements to maintain grid reliability and relieve congestion.
