Total of Default Allocation Percentages
 per Sector
 Vote Breakdown

Groups
 PJM sectors as shown

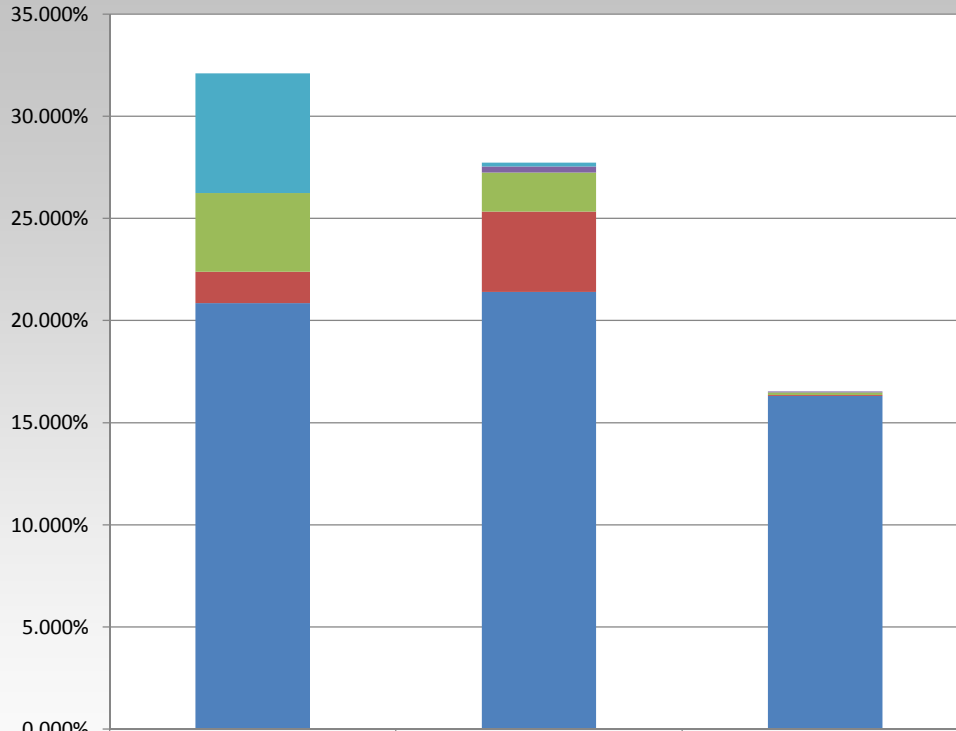

This chart shows how each sector voted from the perspective of measuring gross activity in PJM-administered markets, exclusive of bilateral activity. "Gross activity" is determined by totaling the Default Allocation percentage of all companies that voted, per sector, as defined under Operating Agreement paragraph 15.2.4(a).

* Refer to the Company Designations table "Company Sector" column to see each company's group designation found on this chart.

Other Supplier	1.548%	3.929%	0.042%
Transmission Owner	20.846%	21.406%	16.313%

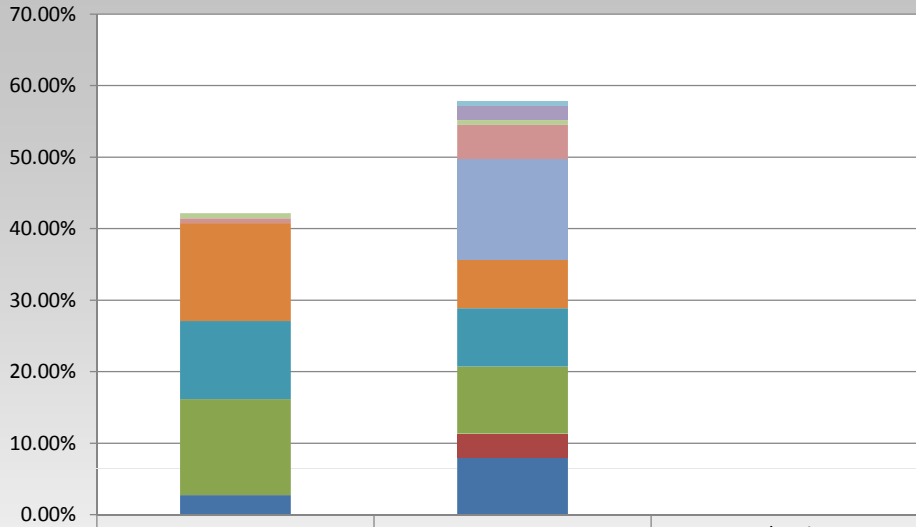

This chart shows how each sector voted from a peak load / generation / transmission perspective by totaling the Weighted Interest percentage of all companies that voted per sector. The Weighted Interest calculation components include the members' peak demand, generating capability, and circuit miles of transmission as defined in Operating Agreement paragraph 1.49. This calculation is used in determining working capital contributions and potential distribution of assets upon dissolution of PJM.

* Refer to the Company Designations table "Company Sector" column to see each company's group designation found on this chart.
