- After the FERC Order, the IMM continued to work with market participants to develop acceptable fuel cost policies.
- A significant number (about 25 percent of units) have passed the IMM screens since the FERC order on February 3.

- Currently, 77 percent of PJM units have algorithmic, verifiable, and systematic fuel cost policies that accurately calculate the short run marginal cost of fuel.
- Of the remaining 23 percent, 15 percent have failed the IMM's evaluation and 7 percent are under review.

- By April 14, the IMM will provide its determination to PJM and market participants on all policies submitted by April 12 (today).
- In MIRA, the policies will show a Pass or Fail IMM status.
- The IMM will continue to review all submitted fuel cost policies and will continue to work with market participants that want to resolve any outstanding issues raised by the IMM.

Fuel Cost Policy Status 4/7/2017

| MMU Categories | Units | Percent |
|----------------|-------|---------|
| Passed | 1,049 | 77% |
| Submitted | 92 | 7% |
| Failed | 200 | 15% |
| Not Submitted | 15 | 1% |
| Total | 1,356 | 100% |

 57 percent of natural gas units have passed the IMM's evaluation. Monitoring Analytics, LLC 2621 Van Buren Avenue Suite 160 Eagleville, PA 19403
