

Transmission Outage Coordination

SOS-T
7/14/10

- Ongoing potential improvements for outage coordination process:
 - PJM to investigate eDART upgrade to warn T.O. upon ticket submittal when competing outage already exists
 - Investigating manual list of outage combination conflicts in the interim
 - If 6-month outage analysis process identifies an inter-zonal conflict, PJM will initiate conference call(s) with impacted T.O.s to address the issue
 - PJM considering refinement to 6-month outage analysis process to screen for outages without restoration planned for Summer peak period
