

PJM Interconnection
Summary of the SIS Meeting for the August 2010 OC Meeting
955 Jefferson Avenue
Norristown, PA
August 17, 2010

1. NERC CAN-005

Mr. John McGlynn provided a presentation on CAN-005. CAN-005 provides clarity around the classification of system operator laptops that can control the Bulk Electric System. A comment was made that system operators are typically working within a physical security perimeter.

NERC has issued a request for comments for CIP-002 Critical Asset Methodology Data Request. Comments are due by 5:00 PM on July 26, 2010.

2. PJM'S EMS OUTAGE MAY 28, 2010

Mr. Colin Brisson provided an overview presentation of the findings of PJM's root cause analysis regarding the EMS outage of May 28, 2010. Mr. Brisson invited members to contact himself or Mr. Mike Bryson with any additional comments.

3. PJM'S NEW EMS (AC²) UPDATE

Mr. Ron Graff provided an update on the AC² project, focusing on SOW#3 (EMS).

4. PJMNET LINK OUTAGE REPORT

Mr. Rich Glaum provided an update on the link outage reports for May and June 2010. A root cause analysis is being developed for a PJM outage in May. Mr. Glaum also discussed recording errors (highlighted in orange on the report). Due to the volume of information being captured, some

points are being dropped. A correction was made to the May 28 report to reflect the EMS outage.

PJM instituted change freezes in June due to the hot weather, which resulted in some scheduled weekly failovers being cancelled.

5. PJM OPERATIONS, EDART AND ESUITE

Mr. Jerry Whooley reviewed the presentation covering the updates. An interim eDART release is scheduled for August. A new release of eData wireless is ready for the sandbox. The URL is scheduled to be distributed by the end of July.
