

PJM Interconnection
Summary of the SIS Meeting for the September 2010 OC Meeting
955 Jefferson Avenue
Norristown, PA
September 14, 2010

1. PJM'S NEW EMS (AC²) UPDATE

Mr. Ken Seiler provided an update on the AC² project, focusing on SOW#3 (EMS).

2. REVIEW OF SOS REPORTS

SOS reports were presented and reviewed for July 2010. There were no comments.

3. PJMNET LINK OUTAGE REPORT

Mr. Rich Glaum provided an update on the link outage reports for July. Several scheduled failovers were cancelled due to hot weather conditions.

Mr. Glaum discussed an issue whereby data was not recorded from July 3rd through July 7th. Mr. Glaum verified this period on another system that uses a different method to collect data, observing some minor outages recorded on that system (typically less than one minute). Mr. Glaum will investigate why this period had no recording.

4. PJM OPERATIONS, EDART AND ESUITE

Mr. Graff substituted for Mr. DeLoach and reviewed the presentation. There will be an outage of Emergency Procedures, eSchedules, and eDART on August 25th starting at 1900 and finishing at 0200. This is to allow infrastructure upgrades to take place. The eDART release that has additional

functionality and which was originally scheduled for August 25th is now set for September 15th.

Wireless eData for smart phones is now available. A new version of eDataFeed is now available.
