

PJM Interconnection
Summary of the SIS Meeting for the October 19, 2010 OC Meeting
955 Jefferson Avenue
Norristown, PA
October 19, 2010

1. PJM'S NEW EMS (AC²) UPDATE

Mr. John Collier provided an update on the AC² project, focusing on SOW#3 (EMS).

2. REVIEW OF SOS REPORTS

SOS reports were presented and reviewed for August. There were no comments.

3. COMMUNICATION & SYSTEMS ISSUES

Mr. Whooley led the discussion on communication and system issues. The NPCC survey was discussed: members were reminded to update and provide their feedback on the highlighted sections. The standard is expected to be ready within another couple of years. The focus will be on performance, with hard metric targets difficult since each situation warrants its own analysis. Mr. Ron Graff will distribute the updated survey results to the members. The SIS will discuss further at the November meeting following a NERC standards meeting on Oct 19, 2010, which Mr. Whooley will attend. Mr. Bob Green commented there were a number of items that were not applicable.

4. PJMNET LINK OUTAGE REPORT

Mr. Rich Glaum provided an update on the link outage reports (attached) for August. In general the ICCP links have been good. Rich clarified the "Recording Error" message. There was a discussion around the lack of multithreading process in the EMS and if this would be resolved with AC2. It would not be resolved under the current vendor contract.

An issue was noted on Thursday 26th which was due to a remote site issue on the ISN network.

This did not affect member companies on the PJMnet links.

5. PJM OPERATIONS, EDART AND ESUITE

Mr. Jerry Whooley reviewed the presentation. There were no comments.
