Manual 12: Performance Score Calculation Updates

Eric Hsia
Performance Compliance
November 5, 2013
Why is Manual 12 changing?

• Changes to performance score calculation methodology under various system conditions were discussed at the April 9, 2013 OC meeting.

• Proposed Manual 12 changes were presented at May 7, 2013, June 4, 2013 and July 8, 2013 OC Meetings.

• These changes were endorsed by the MRC at the August 1, 2013 meeting.
Two changes for calculation of performance scores:

§4.5.9 Performance Scores during Periods with Insufficient Data – When data is unavailable during the operating for periods of greater than 15 contiguous minutes or partial hour assignment the historical performance score will be used as the actual hourly performance score.

§4.5.10 Performance Scores for Regulation Assignments with Limited Notification – Performance scoring will be 10 minutes after PJM Dispatch logs that a resource is providing regulation.
• Consistent with the September 19, 2013 notice sent to the MIC, these changes will be effective on implementation even though endorsed August 1, 2013.

• These assumptions will be included in the Performance Score Calculation Engine starting on November 1, 2013 and be part of the November Bill.
