

Modifications to Insurance Language for Interconnection Service Agreements

Planning Committee
October 5, 2011
Pauline Foley

- In compliance with Order No. 2003, PJM proposed insurance provisions similar to the *pro forma* language contained in the LGIA.

The coverages included:

- *Employers' Liability and Workers' Compensation Insurance,*
- *Commercial General Liability Insurance,*
- *Comprehensive Automobile Liability Insurance and*
- *Excess Public Liability Insurance.*

Proposal to Update the Insurance Language Contained in the Interconnection Service Agreements

- PJM proposes to **modernize/update the *pro forma* insurance language** contained in the interconnection service agreements to be consistent with the terminology currently used in the insurance industry:
 - ISA: Attachment O, Appendix 2, section 13
 - ICSA: Attachment P, Appendix 2, section 11
 - UCSA Attachment GG, Appendix III, section 11

- A number of interconnection customers have requested that PJM change the *pro forma* language in their individual agreement to be consistent with the current industry terminology in order to ensure that they are compliant with the ISA.
- This Tariff modification would :
 - Help eliminate requests to negotiate the *pro forma* language; and
 - Clarify exactly what insurance coverage is required consistent with current industry terminology.
