

## Sara Wilmer

Managing Consultant  
Levitan & Associates

Sara Wilmer, managing consultant of Levitan & Associates, has 12 years of experience in chemical engineering, power generation, heat dynamics and pipeline simulation modeling.

On behalf of the Eastern Interconnection Planning Collaborative as well as other ISOs in the mid-Atlantic and greater Northeast, she has developed steady-state and transient flow models of pipeline systems in order to analyze regional gas flows, delivery capacity, and pipeline network responsiveness when gas or electric contingencies are evaluated. She has been instrumental in the design and implementation of state-of-the-art wholesale power procurement processes on behalf of state entities and electric utilities throughout the U.S.

Ms. Wilmer has provided quantitative research, data management, and engineering and modeling support on diverse client engagements, including renewable energy projects.

She received her Bachelor of Science degree in chemical engineering from the Massachusetts Institute of Technology.
