

Todd Duffield

Manager of Gas Control
and Pipeline Operations
Integrys Energy Group

Todd Duffield is a 30-year veteran of the gas industry with experience in interstate gas transmission, production gathering and gas distribution with responsibilities for construction, project management, design and operations. His current responsibilities as manager of Gas Control and Pipeline Operations for Integrys Energy Group include Gas Control Center operations responsible for monitoring and control related to Integrys' five utilities with gas operations spread over four states; and for transmission pipeline operations and field SCADA support for Peoples Gas.

He is active as chairman of Integrys Energy Group's Transmission Pipeline Integrity Committee, as a subject matter expert on Peoples Gas Distribution Integrity Committee and a member of the Integrys Gas/Electric Coordination Committee. He participates in the American Gas Association's Gas Control Committee which is active in cyber security and gas/electric coordination activities, particularly with an eye on proposed changes to the gas day.

Among his many responsibilities over the years, Mr. Duffield has engaged in fuel supply and balancing activities for gas-fired power plants, including roles in facility planning, design and operations. He supported power plant development efforts in the western U.S. by establishing plans for pipeline interconnects and fuel supply in Oregon, Texas and New Mexico. He has also spent time working closely with marketing and trading personnel preparing fuel management proposals, and he maintains a finger on the pulse of gas market fundamentals.

Mr. Duffield and his wife Karen are 27-year residents of Aurora, Illinois. They have two sons with one in college and one in high school. Family interests include soccer, track and field, boating and gardening.
