

# Efficiency of Demand Response Registration Process Update

DRS

December 10, 2013

- Streamline the process for demand resources to participate in PJM's Emergency Load Response Program by removing load serving entities from the registration process.
- Filed Docket No. ER14-277-000 on Nov. 1, 2013
- Effective date requested of Jan 1, 2014, expect FERC to rule shortly before then
- A couple of parties moved to intervene but there were no protests or comments filed

- **Emergency Registrations:**
  - CSP should enter the EDC name as the LSE
  - EDCs should not reject emergency registrations for not being the LSE for the registration
  - eLRS will be enhanced in the future to not require the LSE

Emergency Registrations: LSE = EDC to implement new rule change  
EDC should not deny registration

- Economic Registrations:
  - No change. LSE still reviews registrations.
  - If you copy an emergency registration to create an economic registration, make sure you use the correct LSE

The screenshot shows the PJM Economic Registration Details page. A red circle highlights the 'Program' dropdown menu, which is currently set to 'Economic (1/1/09-1/1/20)'. A red arrow points from a text box to the 'LSE' dropdown menu, which is open and showing a list of options including BC, 1124L, 1201L, AEP, APS, BC, CNC, CNE, CPTO2, HP211, HP212, HP213, HP214, HP215, HP216, HP217, HP218, HP219, HP220, HP221, HP222, HP223, HP224, HP225, HP226, HP227, HP228, HP229, HP230, HP231, HP232, HP233, HP234, HP235, HP236, HP237, HP238, HP239, HP240, HP241, HP242, HP243,
