PJM now has online training available for Wind Generation resources. The training is accessible by clicking on the TRAINING link located at the top of the PJM.COM home page. From there, click on the ONLINE COURSES link located in the middle of page. A list of online courses will appear and at the very bottom of that list you should find the course, “Wind Generation Operational Considerations”. Click on that link to open up the next menu.

There are three courses presentation available and can be viewed by clicking on the appropriate hyperlink below each presentations description.

Presentation One:  **Wind Dispatchability Checklist.**

This presentation will introduce the viewer to the PJM Wind Dispatchability Checklist and provide them with the list of criteria needed to be considered PJM Dispatchable.
