BES Definition

Reliability Standards & Compliance Subcommittee
September 20, 2013
• Ballot failed by a very slim margin (66.1%)
• Comments from the industry revealed the vast majority of the negative votes were due to the inclusion I4 were *individual* wind machines are included as elements of the BES.
  – The collector system is included at the point where a total of 75MVA were accumulated to the interconnection at 100 kV or higher.
    • The industry indicated that, for a variety of reasons, the individual turbines should not be included, but treated commensurate with the accumulation concept
• SDT will review comments and repost the Standard
