Three new lessons learned have been posted on the NERC website under “Event Analysis – Lessons Learned” on the Reliability Risk Management page.

The new lessons address the following topics:

- Current Transformer Ground Relay
- Transmission Relaying – Backup Ground Protection
- Use Loading Resistors When Applying Solid State Contacts to High Impedance Input Devices

For more information or assistance, please contact Sandy Shiflett (via email) or at (404) 446-2575.
