Manual M-13 Changes

May 2014
• Load Management Specific changes to sections 2.3 and 5.2 to be effective 6/1/14
• Load dump tables updated based on 2014 PY values: Attachments E, F and N.

NOTE: The posted redline version of M-13 includes the non-Load Management related changes that were endorsed at the April MRC for a 6/1/14 effective date.
• Load Management rule changes:
  - New categories: Pre-Emergency and Emergency
  - New notification times: 30, 60 and 120 minutes notice
  - Sub-zonal Load Management is permissible
Load Management related changes to sections 2.3 and 5.2

- Exhibit 1 Action steps modified to reflect Pre-Emergency and Emergency Load Management
- Added language to the Maximum Emergency Generation Alert to include notice that Load Management may be required.
- Updates to Steps 1 and 2 to reflect the new categories and times.
- Noted that the minimum duration is 1-hr
- Added clarification that the official notice for CSPs to dispatch DR resources is the eLRS System. Emergency Procedures (EPs) will continue to be posted.
  - The All-Call will continue to be issued but will be generic and indicate that DR has been called and that details are available on the EP website.
- Deleted Note 3 due to redundancy
Load Management related changes to Attachment C

- Eliminated Part C of the SSR for reporting of Load Response. These values will already be provided to PJM through the eLRS system by the CSPs.

- Attachment G: Capacity Emergency Matrix
  - Updated the matrix with the load management changes made to sections 2.3 and 5.2
General changes

• Attachment F: Manual Load Dump Capability tables
  – Updated the Manual Load Dump capability table with the 2014/15 PY numbers
  – Update the FE company names
• Attachment E: Manual Load Dump Allocation tables
  – Updated the Mid Atlantic Load shed table with the 2014/15 PY numbers
  – Update the FE company names
  – Eliminated the table for the Eastern portion of the Mid Atlantic
• Attachment N: IROL Load Dump Table
  – Update the FE company names
