Lessons Learned
June 19, 2014

Four new lessons learned have been posted to the NERC website under “Event Analysis – Lessons Learned”.

The new lessons address the following topics:

- Loss of SCADA Due to Memory Resources Being Fully Utilized
- Verify That Actions Called for in Operating Guides Can Be Implemented Within Required Time Frames
- Generation Relaying – Overexcitation
- Generation Relaying - Underfrequency Protection Coordination

For more information or assistance, please contact Sandy Shiflett (via email) or at (404) 446-2575.
