Gas Electric Senior Task Force

Sean McNamara
PJM Interconnection
Gas Electric Senior Task Force
• Task force is focused on gas-fired generation issues and their participation in PJM markets
  – Solutions may impact all generation types and load
• Near-term Issues
  – Implemented prior to [2014/2015 & 2015/2016 winter periods]
  – Generator Availability and Flexibility
• Longer-term Issues
  – Fuel Firming
Generator Availability & Flexibility

• **Day-Ahead Market Timing Adjustment**
  – PJM believes this is a necessary step
  – Provides generator commitment information before the gas Timely Nomination cycle ends
  – What are the impacts to other generators, LSEs?

• **Bid Flexibility**
  – Split bidding
  – Hourly bidding
  – Other
• Communication/Emergency Alert Notification
  – Automating flow of critical operational information
  – Protocol for communication during peak demand days
• Unit Commitment
  – Committing units prior to Day-Ahead market
  – Units running past their commitment – Compensation
• Fuel Firming
  – Cost Recovery for:
    • Firm Transportation
    • Dual Fuel
    • Firm Commodity
    • Capacity Release

• Gas Balancing Charges
  – Cost Recovery
    • PJM request [instruction]
