Conference Call: 866-469-3239; Meeting ID: 358 850 337
Norristown, PA
December 7th, 2009
12:00 PM

1. **WELCOME & INTRODUCTION**

2. **AGENDA REVIEW**

Wendy Casterline will lay out the topics that will be discussed during the meeting.

3. **ENHANCEMENTS SCHEDULED FOR DECEMBER 11TH RELEASE**

Wendy Casterline will outline enhancements to the transmission related functionalities in eDART. These include:

- Power Systems Stabilizer (PSS) – New type of ticket to capture outages to unit PSS.
- Future Facilities – Functionality added to transmission model and network applications to capture facility cut-ins.
- Ticket Notification Downloads – Functionality to download notifications to generation/transmission outages already captured in the acknowledgement required reports.
- Date Log Changes – The addition of user ID and changes to the print version of transmission tickets.
- XML Throttling – Limitations to download frequency for eDART and Emergency Procedures.

4. **SECONDARY EDART RELEASE**

Wendy Casterline will review post-release changes scheduled at a later date.

- Restoration Data Filtering – Added sorting functionality.
- Submit On Time Flag – Addition of the Submit on time flag to transmission outage reports.
- EMS Outage List – Inclusion of the data from the top section of the OASIS linesout file into the Transmission Outage Ticket application with availability for download via TOIMWG.

5. ALLOWING MULTIPLE COMPANY TICKET IDS FOR TRANSMISSION TICKETS

A request has been made to add functionality to the transmission outage tickets to allow for multiple company ticket ids to be tied to a specific ticket. Wendy Casterline will lead a discussion to determine feasibility and impacts to current interfaces.

6. QUESTION AND ANSWER RESOLUTION SESSION
