

# Multiple Company Ticket ID's for Transmission Tickets

**December 7th, 2009**  
**EDUG - T Meeting**

- Current Transmission Outage Tickets may be linked to multiple jobs with each jobs having it's own job number.
- Current Transmission Ticket functionality only allows for one job number to be linked to ticket.
- Request has been made to allow for multiple job numbers.

- Current functionality assigns hard links between job number and eDART ticket number and job number and company.
- XML Uploads and Downloads would be greatly affected.
- Impacts being reviewed with DXC.

- Company Ticket ID in place now would be the Primary Company Ticket ID with three alternates allowed.
- All the hard links would remain in place but only for the Primary Company Ticket ID.
- Functionality to be added that when a Company Ticket ID is blank you can add a Company Ticket ID.

**New Transmission Ticket**

User: test Company: PJM Test

Company Ticket ID:

Primary Secondary

Tertiary Quaternary

Ticket Start Ticket End Switch Date

Date (m/d/yyyy) Hour (h:24 m) Date (m/d/yyyy) Hour (h:24 m) Date (m/d/yyyy) Hour (h:24 m)

Location/Description of Work (500 characters max)

Information/Hotline Work

For System Planning Only
