

Market Settlements Subcommittee Update

Ray Fernandez
Manager, Market Settlements
Development

- **Settlement of Emergency Load Response and Emergency Energy**
 - Only initial RT load values are currently used in allocation of Emergency LR charges
 - Use of reconciled load data will accurately reflect corrected meter values in adjustments to charge allocations
 - Load reconciliation can also be considered for adjustments to Emergency Energy charges

- Education on current charge allocations and impact assessment
- Develop potential solutions
- Review governing documents for necessary changes
- Approve a solution and develop document changes
- Obtain approval for document changes and implement the solution

- Estimate that key work activities can be completed during 3rd and 4th quarters of 2014
