

PJM Interconnection and its members benefit from the activities of the Organization of PJM States Inc., which is made up of the utility regulatory agencies of the 14 jurisdictions in the region PJM serves. The organization plays an important role in fostering a cooperative regional approach among the states on PJM issues and in advising PJM on regulators' concerns and viewpoints.

Formed in 2005, the Organization of PJM States Inc. (OPSI) acts as a liaison group to PJM and its members. The nonprofit group collects information; monitors markets and developments; considers PJM-related proposals involving reliability, safety, facility siting and electricity prices; and works with PJM on initiatives related to the regional transmission organization.

PJM maintains close contact with the group, holding regularly scheduled calls with OPSI to share information. The group also meets with the PJM Board of Managers at least once a year and communicates regularly with PJM's Independent Market Monitor.

In a plan approved by the Federal Energy Regulatory Commission, PJM collects OPSI's annual budget through a formula rate. The rate is applied to every megawatt-hour of energy delivered under the PJM Tariff; the charge is shown as a separate item on PJM customer bills.

Jan. 7, 2025

The members of OPSI are:

- Delaware Public Service Commission
- Public Service Commission of District of Columbia
- Illinois Commerce Commission
- Indiana Utility Regulatory Commission
- Kentucky Public Service Commission
- Maryland Public Service Commission
