#### 1. Critical Issue Fast Path – DOE 202(c) Cost Allocation

1–2:30 p.m.

- A. As follow up from the June 18, 2025, Members Committee meeting, the Board of Managers will discuss the Critical Issue Fast Path packages and stakeholder presentations, as well as the voting results and any written comments received, and determine the next steps to:
- Satisfy the requirements of the June 17, 2025, letter from the Department of Energy referring rate issues to FERC;
  - Address cost allocation associated with the recovery of payments to the Eddystone units and other potential units that may be the subject of future order(s) to maintain operational availability as directed by the Secretary of Energy pursuant to section 202(c) of the Federal Power Act; and
  - Select the proposal that deems to be the most appropriate and approve, pursuant to section 16.4 of the Reliability Assurance Agreement, amendments to the Reliability Assurance Agreement that are necessary to effectuate such proposal.
- B. The Board will develop a communication to the Members setting forth the Board's selection of any solution and its reasoning.
