Re: PJM Ratepayer Comments on the Large Load CIFP

Dear Chair Mills, Mr. Asthana and the PJM Board of Managers,

Please find the enclosed signatures of 1,391 ratepayers from all PJM states and Washington, D.C. in support of a large load policy that requires data centers to bring their own new power supply or take interruptible service, and ensures that their supply can't cut to the front of the line to connect to the grid.

Without the right rules in place, this new data center demand will raise power bills, increase the risk of blackouts, and create more air pollution. As the PJM board makes its consequential decision about how data centers draw power from the electricity grid, please consider the voices of the below billpayers who are asking the PJM board for protection against high energy bills and increased risk of blackouts.

Comment to PJM Board (signed by the following list of 1,391 ratepayers):

Our electric bills are soaring at an alarming rate. Residents, families, and small businesses should not be forced to pay the price for new data centers run by some of the richest companies in the world. PJM must make the right decision to protect residents from high energy bills and increased risk of blackouts: require data centers to bring their own new power supply or risk getting turned off, and ensure that their power can't cut to the front of the line to connect to the grid.
