2021 State of the Market Report for PJM

Informational MC 04.05.2022

Joe Bowring

Market Monitoring Unit

- Monitoring Analytics, LLC
 - Independent company
 - Formed August 1, 2008
- Independent Market Monitor for PJM
 - Independent from Market Participants
 - Independent from RTO management
 - Independent from RTO board of managers
- MMU Accountability
 - To FERC (per FERC MMU Orders and MM Plan)
 - To PJM markets
 - To PJM Board for administration of the contract

Role of Market Monitoring

- Market monitoring is required by FERC Orders
- Role of competition under FERC regulation
 - Mechanism to regulate prices
 - Competitive outcome = just and reasonable
- FERC has enforcement authority
- Relevant model of competition is not laissez faire
- Competitive outcomes are not automatic
- Detailed rules required
- Detailed monitoring required:
 - Of participants
 - 。 Of RTO
 - Of rules

Role of Market Monitoring

- Market monitoring is primarily analytical
 - Adequacy of market rules
 - Compliance with market rules
 - Exercise of market power
 - Market manipulation
- Market monitoring provides inputs to prospective mitigation
- Market monitoring provides retrospective mitigation
- Market monitoring provides information
 - 。 To FERC
 - To state regulators
 - To market participants
 - 。 To RTO

Market Monitoring Plan

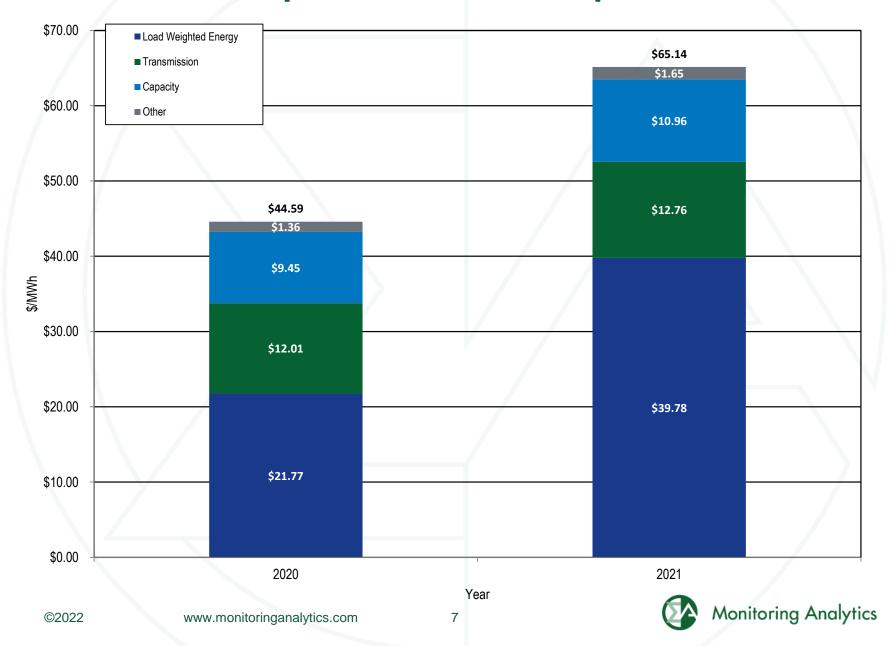

- Monitor compliance with rules
- Monitor actual or potential design flaws in rules
- Monitor structural problems in the PJM market
- Monitor the potential of market participants to exercise market power
- Monitor for market manipulation

Total price of wholesale power

PJM summary statistics

	2020	2021	Percent Change
Average Hourly Load Plus Exports (MW)	90,059	92,774	3.0%
Average Hourly Generation Plus Imports (MW)	91,674	94,501	3.1%
Peak Load (MW)	148,996	151,680	1.8%
Installed Capacity at December 31 (MW)	184,237	186,593	1.3%
Load Weighted Average Real Time LMP (\$/MWh)	\$21.77	\$39.78	82.8%
Total Congestion Costs (\$ Million)	\$528.7	\$995.3	88.3%
Total Uplift Credits (\$ Million)	\$90.9	\$178.3	96.1%
Total PJM Billing (\$ Billion)	\$36.28	\$54.13	49.2%

The energy market results were competitive

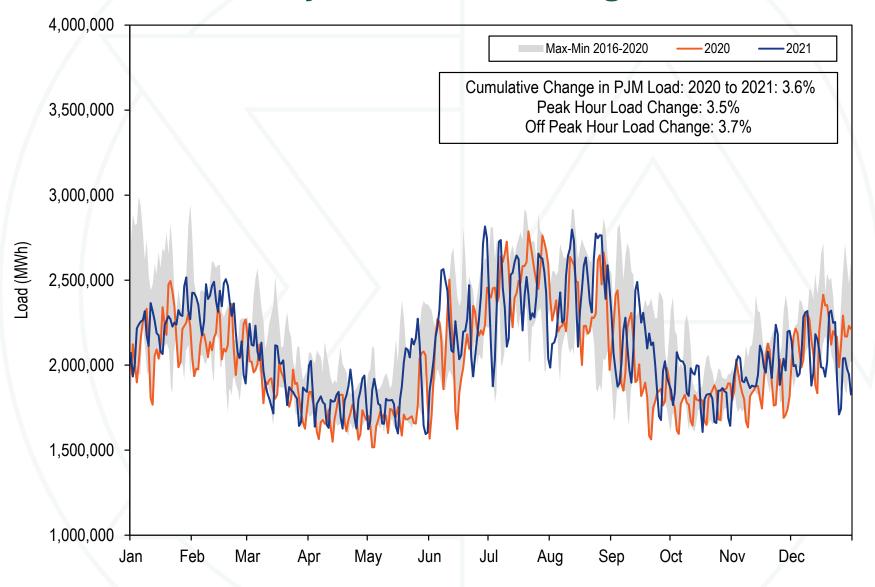

Market Element	Evaluation	Market Design
Market Structure: Aggregate Market	Partially Competitive	
Market Structure: Local Market	Not Competitive	
Participant Behavior	Competitive	
Market Performance	Competitive	Effective

Recommendations: Energy Market

- The day ahead energy market must offer requirement equal to ICAP for capacity resources should be enforced.
- Fuel cost policies should be verifiable and enforceable. All resources should be required to follow their fuel cost policies at all times.
- The loopholes in offer capping implementation should be closed.
- Virtual bidding should be eliminated at nodes that aggregate only small portions of the transmission system.
- Major maintenance should not be included in costbased offers

RT daily load: 2020 through 2021

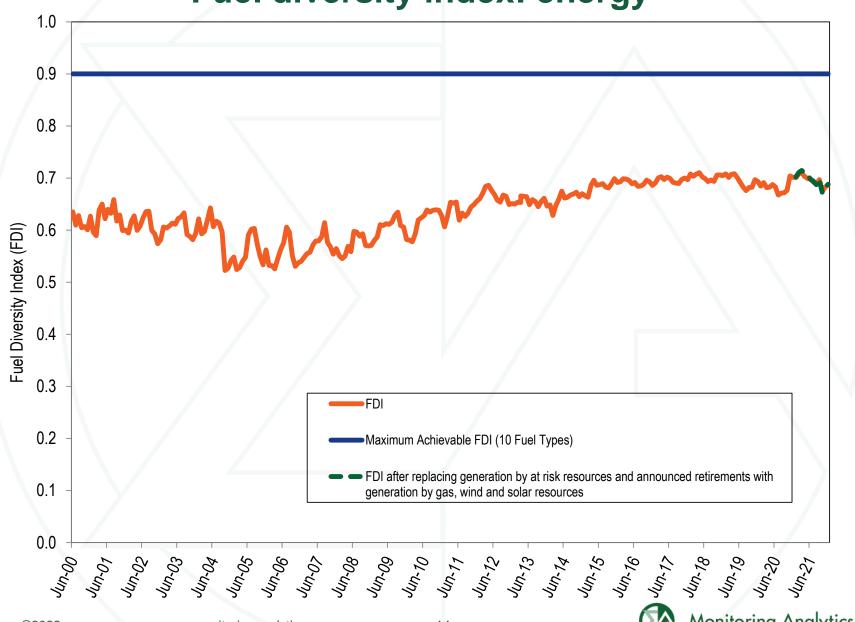

RT load and load plus exports

	PJM Real-Time Demand (MWh)					Year to Year

Average Tier I REC price by jurisdiction

Renewable energy credits

- There should be a single PJM operated forward market for RECs, for a single product based on a common set of state definitions of renewable technologies, with a single clearing price, trued up to real time delivery.
- Only if states agree.

The capacity market results were not competitive

Market Element	Evaluation	Market Design
Market Structure: Aggregate Market	Not Competitive	
Market Structure: Local Market	Not Competitive	
Participant Behavior	Not Competitive	
Market Performance	Not Competitive	Mixed

Capacity market issues

- Market seller offer cap
- VRR curve shape and location
- Definition of capacity
- Intermittent capacity definition: ELCC
- DR/EE
- MOPR
- Reserve margin

Profile of units at risk of retirement

	No. Units		Avg. Unit Age (Yrs)	Avg. Heat Rate (Btu/Mwh)
Total	31	2,230	49	14,541

Map of unit retirements: 2011 through 2024

Recommendations: Planning

- Modify the transmission project proposal templates to include data necessary to perform a detailed project lifetime financial analysis.
- All PJM transmission owners should use the same line rating method and implement dynamic line ratings (DLR), subject to NERC standards and guidelines, subject to review by NERC, PJM and the MMU, and approval by FERC.
- The market efficiency process should be eliminated. If retained, the cost/benefit calculation for economic projects needs to be corrected.

Recommendations: Energy Market Uplift

- PJM should ensure that units not following dispatch are not paid uplift.
- Flexible operating parameters should be required as a condition for receiving uplift.
- Uplift should not be paid to units backed down for reliability because there is no lost opportunity.

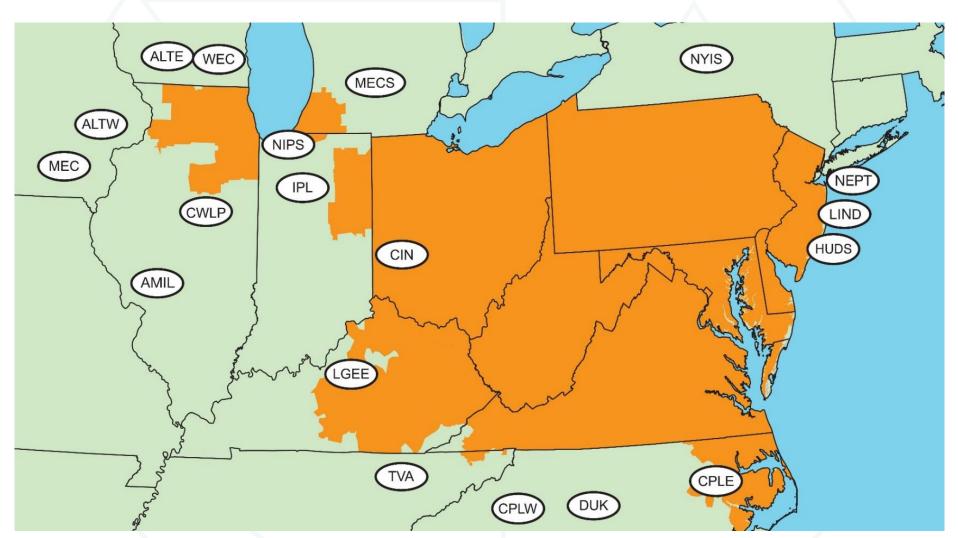

Total energy uplift charges

	Total Energy Uplift Charges (Millions)	Change (Millions)	Percent Change	Energy Uplift as a Percent of Total PJM Billing
2001	\$284.0	\$67.0	30.9%	8.5%

PJM's footprint and its external scheduling interfaces

Scheduled import and export transaction volume history

The regulation market results were not competitive

Market Element	Evaluation	Market Design
Market Structure	Not Competitive	
Participant Behavior	Competitive	
Market Performance	Not Competitive	Flawed

The tier 2 synchronized reserve market results were competitive

Market Element	Evaluation	Market Design
Market Structure: Regional Markets	Not Competitive	
Participant Behavior	Competitive	
Market Performance	Competitive	Mixed

The DASR market results were competitive

Market Element	Evaluation	Market Design
Market Structure	Not Competitive	
Participant Behavior	Mixed	
Market Performance	Competitive	Mixed

Recommendations: Ancillary Services

- The regulation market should be modified to incorporate a consistent application of the marginal benefit factor (MBF) throughout the optimization, assignment and settlement process.
- Separate cost of service payments for reactive capability should be eliminated and the cost of reactive capability recovered in the capacity market.
- New CRF rates for black start units, incorporating current tax code changes, should be implemented immediately for all black start units.

The FTR/ARR markets results were partially competitive

Market Element	Evaluation	Market Design
Market Structure	Competitive	
Participant Behavior	Partially Competitive	
Market Performance	Partially Competitive	Flawed

Recommendations: FTR/ARR

 Rights to all congestion revenues should be assigned to load.
