

Planning Committee (PC) Monthly Progress Report

10/08/2024

1. Issue Title

[Enhancing Capacity Interconnection Rights \(CIR\) Transfer Efficiency](#)

Target Completion Date

PC First Read - 9/12/2024

PC Endorsement – 10/8/2024

[Enhancing Capacity Interconnection Rights \(CIR\) Transfer Efficiency – Work Plan](#)

Issue Status

The CIR Transfer Efficiency matrix was originally worked at the Interconnection Process Subcommittee (IPS). A proposed update to the [Issue Charge](#) was endorsed at the June 2024 PC meeting and all the work activities were transferred to the PC from IPS beginning with the July 2024 PC meeting. In response to the updated Issue Charge, at both the July and August PC meetings, an updated Work Plan was reviewed along with the design components and solution options and interests. The proposal sponsors also presented their packages at the July, August, September and October PC meetings. A solution proposal from the Stakeholder Coalition was endorsed at the PC meeting on October 8, 2024.

The Coalition proposal package will move to the Markets & Reliability Committee as the Main Motion.

Action Requested

None.

History/Background

The work activities were carried over from the IPS beginning with the July PC meeting.
