

Effective Load Carrying Capability Senior Task Force Monthly Progress Report

April 16, 2025

1. Capacity Market Enhancements – ELCC Accreditation Methodology

Target Completion Date

June 2025

Issue Status

The ELCCSF is continuing its work on the remaining Accreditation Methodology design components. Discussion on solution options is expected to continue at the April 22 and subsequent ELCCSTF meetings. The updated [work plan](#) calls for the ELCCSTF's work to be completed on remaining design components and solutions by June 2025.

Action Requested

Stakeholders are asked to continue to provide input on solution options and packages on the remaining design components in ELCC Accreditation Methodology matrix.

2. Capacity Market Enhancements – Data Transparency

Target Completion Date

April 2025

Issue Status

Since initiating work on the Data Transparency issue in December 2024, the senior task force has developed a single consolidated package sponsored by Dominion and PJM to improve data transparency and stakeholder understanding of ELCC accreditation analysis.

An offline vote on the solution package was closed on March 25. The ELCCSTF endorsed the Dominion/PJM package with 100% support. The matrix containing the solution package (Package D) can be found [here](#).

The proposed solution and corresponding manual revisions will be presented for a first read at the April 23 MRC meeting.

Action Requested

Stakeholders are asked to review the solution package and manual revisions in preparation for the first read during the April 23 MRC.

3. Capacity Market Enhancements – CETL

Target Completion Date

TBD

Issue Status

At its 3/18/2025 meeting, the senior task force resumed work on the CETL issue. Stakeholders added interests and design components to the [matrix](#).

At the 4/3/2025 meeting, Tom Hoatson, LS Power, proposed that the senior task force defer the CETL issue until such time that seasonal capacity is undertaken. No stakeholders objected. Michele Greening, PJM, discussed next steps to bring this proposed deferral to the Markets and Reliability Committee as the ELCCSTF's parent.

Action Requested

Stakeholders are encouraged to provide any additional input to the proposed deferral of the CETL issue for the April 23 MRC.
