

Effective Load Carrying Capability Senior Task Force Monthly Progress Report

July 24, 2025

1. Capacity Market Enhancements – ELCC Accreditation Methodology

Target Completion Date

August 2025

Issue Status

The ELCCSF is continuing its work on the Accreditation Methodology solution packages. Discussion on solution options and scenario analysis related to ELCC accreditation has continued at ELCCSTF meetings throughout June and July. Solution packages have been offered by Vistra, the IMM, PJM, EKPC, LS Power and ODEC. The updated [work plan](#) calls for the ELCCSTF's work to be completed on solution packages in time for an offline vote following the July 25, 2025 meeting. The vote on solution packages will close at 5:00 p.m EPT on July 29.

Action Requested

Stakeholders are asked to continue to provide input on solution packages in the ELCC Accreditation Methodology matrix ahead of the offline vote opening on July 25. Please subscribe to the ELCCSTF distribution list for updates from the facilitation team and visit the [ELCCSTF page](#) to see the latest materials and matrix. Any questions regarding the offline vote can be directed to Voting_Support@PJM.com.

2. Capacity Market Enhancements – CETL

Target Completion Date

TBD – On hold

Issue Status

At its 3/18/2025 meeting, the senior task force resumed work on the CETL issue. Stakeholders added interests and design components to the [matrix](#).

At the 4/3/2025 meeting, Tom Hoatson, LS Power, proposed that the senior task force defer the CETL issue until such time that seasonal capacity is undertaken. No stakeholders objected. At the May 21 MRC, Members passed a motion to defer the CETL Issue Charge until such time that stakeholders undertake work on a seasonal capacity construct. The motion passed with a sector-weighted vote tally of 3.699.
