

Market Implementation Committee Monthly Progress Report

10/16/2025

1. Issue Title

[External Resource Capacity Clearing](#)

Target Completion Date

[MIC Work Plan](#)

Issue Status

A solution option was presented as a First Read at the June 2025 MIC. North Carolina Electric Membership Corporation (NCEMC) filed a complaint with FERC in June ahead of the expected July endorsement. NCEMC decided not to pursue a vote pending FERC action, and stakeholders agreed to table the issue until such action.

Illinois Municipal Electric Agency (IMEA) suggested repurposing the existing issue charge to suit their desire, and presented a revised issue charge as a first read at the September MIC, but found that their interests were out of scope on the existing issue charge. IMEA is expecting to bring forth a new issue charge to capture their interests.

Action Requested

None.

History/Background

This issue charge was approved at the December 2024 MIC. Stakeholders worked on solution packages up to the June 2025 MIC, during which NCEMC decided to file a complaint with FERC and not proceed with a vote at the July MIC. Stakeholders initially considered tabling the issue until FERC action, but ultimately reached consensus on proposing alternative solution options, as IMEA decided to adjust the issue charge to suit their needs.
