

## Connect and Manage Senior Task Force (CAMSTF) Monthly Progress Report

April 15, 2026

### 1. Implementation of Connect and Manage Framework for Large Load Interconnections

#### Target Completion Date

June 2026 - [CAMSTF Work Plan](#)

#### Issue Status

At the March 25, 2026 Markets and Reliability Committee (MRC) meeting, Members approved the amended Issue Charge in a sector-weighted vote with 4.909 in favor.

The CAMSTF initial meeting was held on March 31, 2026 focusing primarily on educational topics and the initiation of interest identification under the Consensus Based Issue Resolution (CBIR) process. A stakeholder feedback poll was initiated following the meeting to provide an additional opportunity for stakeholders to share additional feedback and questions. Feedback received by April 10, 2026 was posted on the CAMSTF page for reference.

An additional meeting of the CAMSTF was held on April 10, 2026 with a continuation of education and CBIR interest identification followed by an initial discussion starting CBIR design components and solution options. The poll remains open for stakeholders to share additional feedback and questions. Additional on-going feedback will be compiled periodically and posted to the CAMSTF page.

#### Action Requested (if necessary)

All participants are encouraged to provide their feedback in response to the poll and to provide their input for the CBIR matrix. Please contact [Michele Greening](#) and [Mollie Lacek](#) should you have related questions.

### 2. Large Load Customer Flexibility

#### Target Completion Date

TBD

#### Issue Status

At the March 25, 2026 Markets and Reliability Committee (MRC) meeting, Members approved the Issue Charge in a sector-weighted vote with 4.559 in favor.

The CAMSTF initial meeting was held on March 31, 2026 focusing primarily on educational topics and the initiation of interest identification under the Consensus Based Issue Resolution (CBIR) process.
