- This work was intended to address a specific OATT issue that prohibits behind-the-meter (BTM) battery energy storage systems (BESS) participating in the Regulation Market from injecting into the distribution grid in PJM zones with Net Energy Metering (NEM). PJM expects to address this issue in its proposed FERC Order 2222 compliance date of February 2, 2028. The subcommittee seeks earlier allowance of injection from these BTM BESS in NEM zones solely for participation in the Regulation Market.
