

Interregional Coordination Update

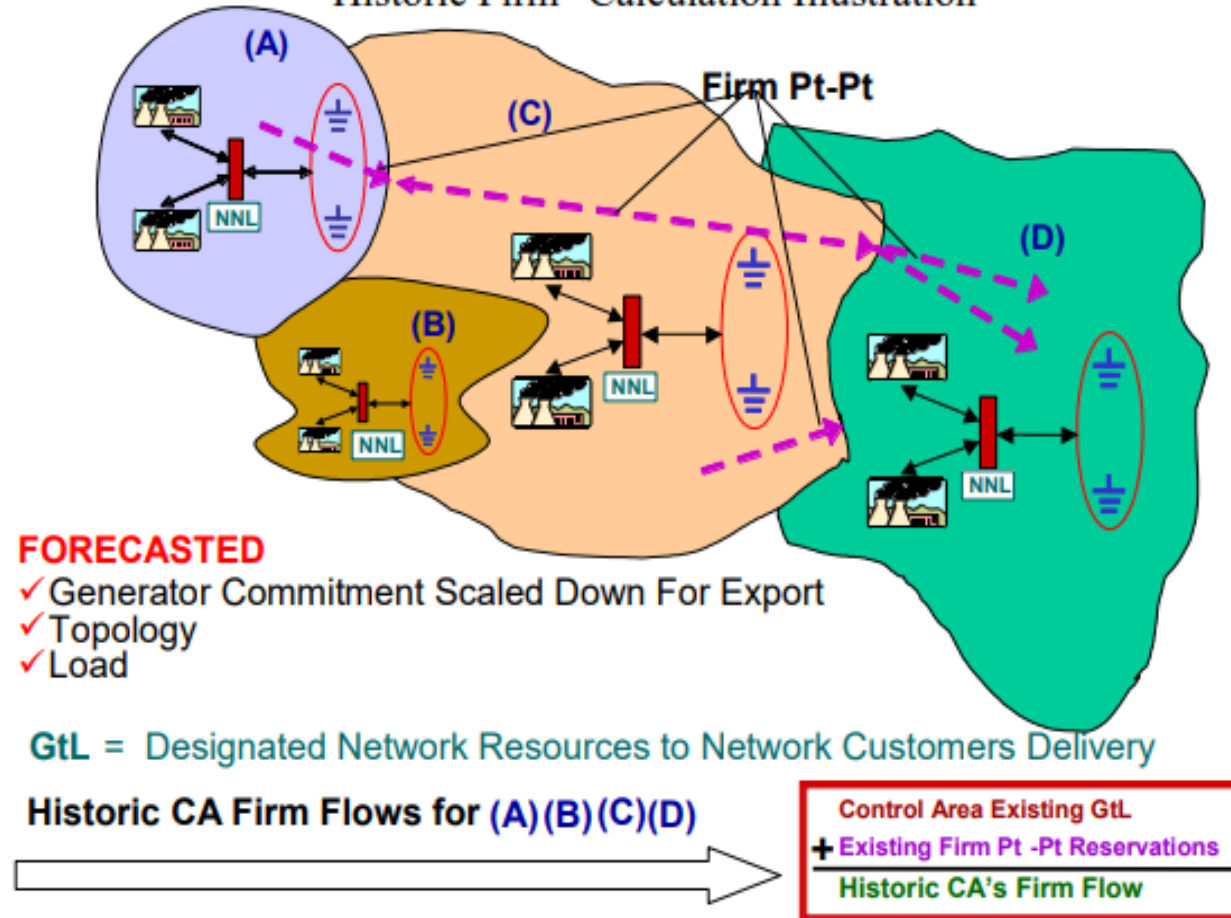

Mike Handlin
Interregional Market Operations
Market Implementation Committee
September 10, 2025

CMP members continue to meet on a regular basis working through Freeze Date data analysis.

Aug 28, 2025	Oct 13, 2025	Sep 25, 2025
Last CMPWG meeting only	Next CMP Council meeting	Next CMPWG meeting *FD Only

Aug CMP meetings focus on PFV Change Order #444 that captures flowgate attributes prior to accounting for freeze date overrides

“Historic Firm” Calculation Illustration

Other Areas of Focus in CMPWG

Firm Flow Limit Update

Considering PFV for FFL

Energy Storage Resource Considerations in Market Flow Calculation

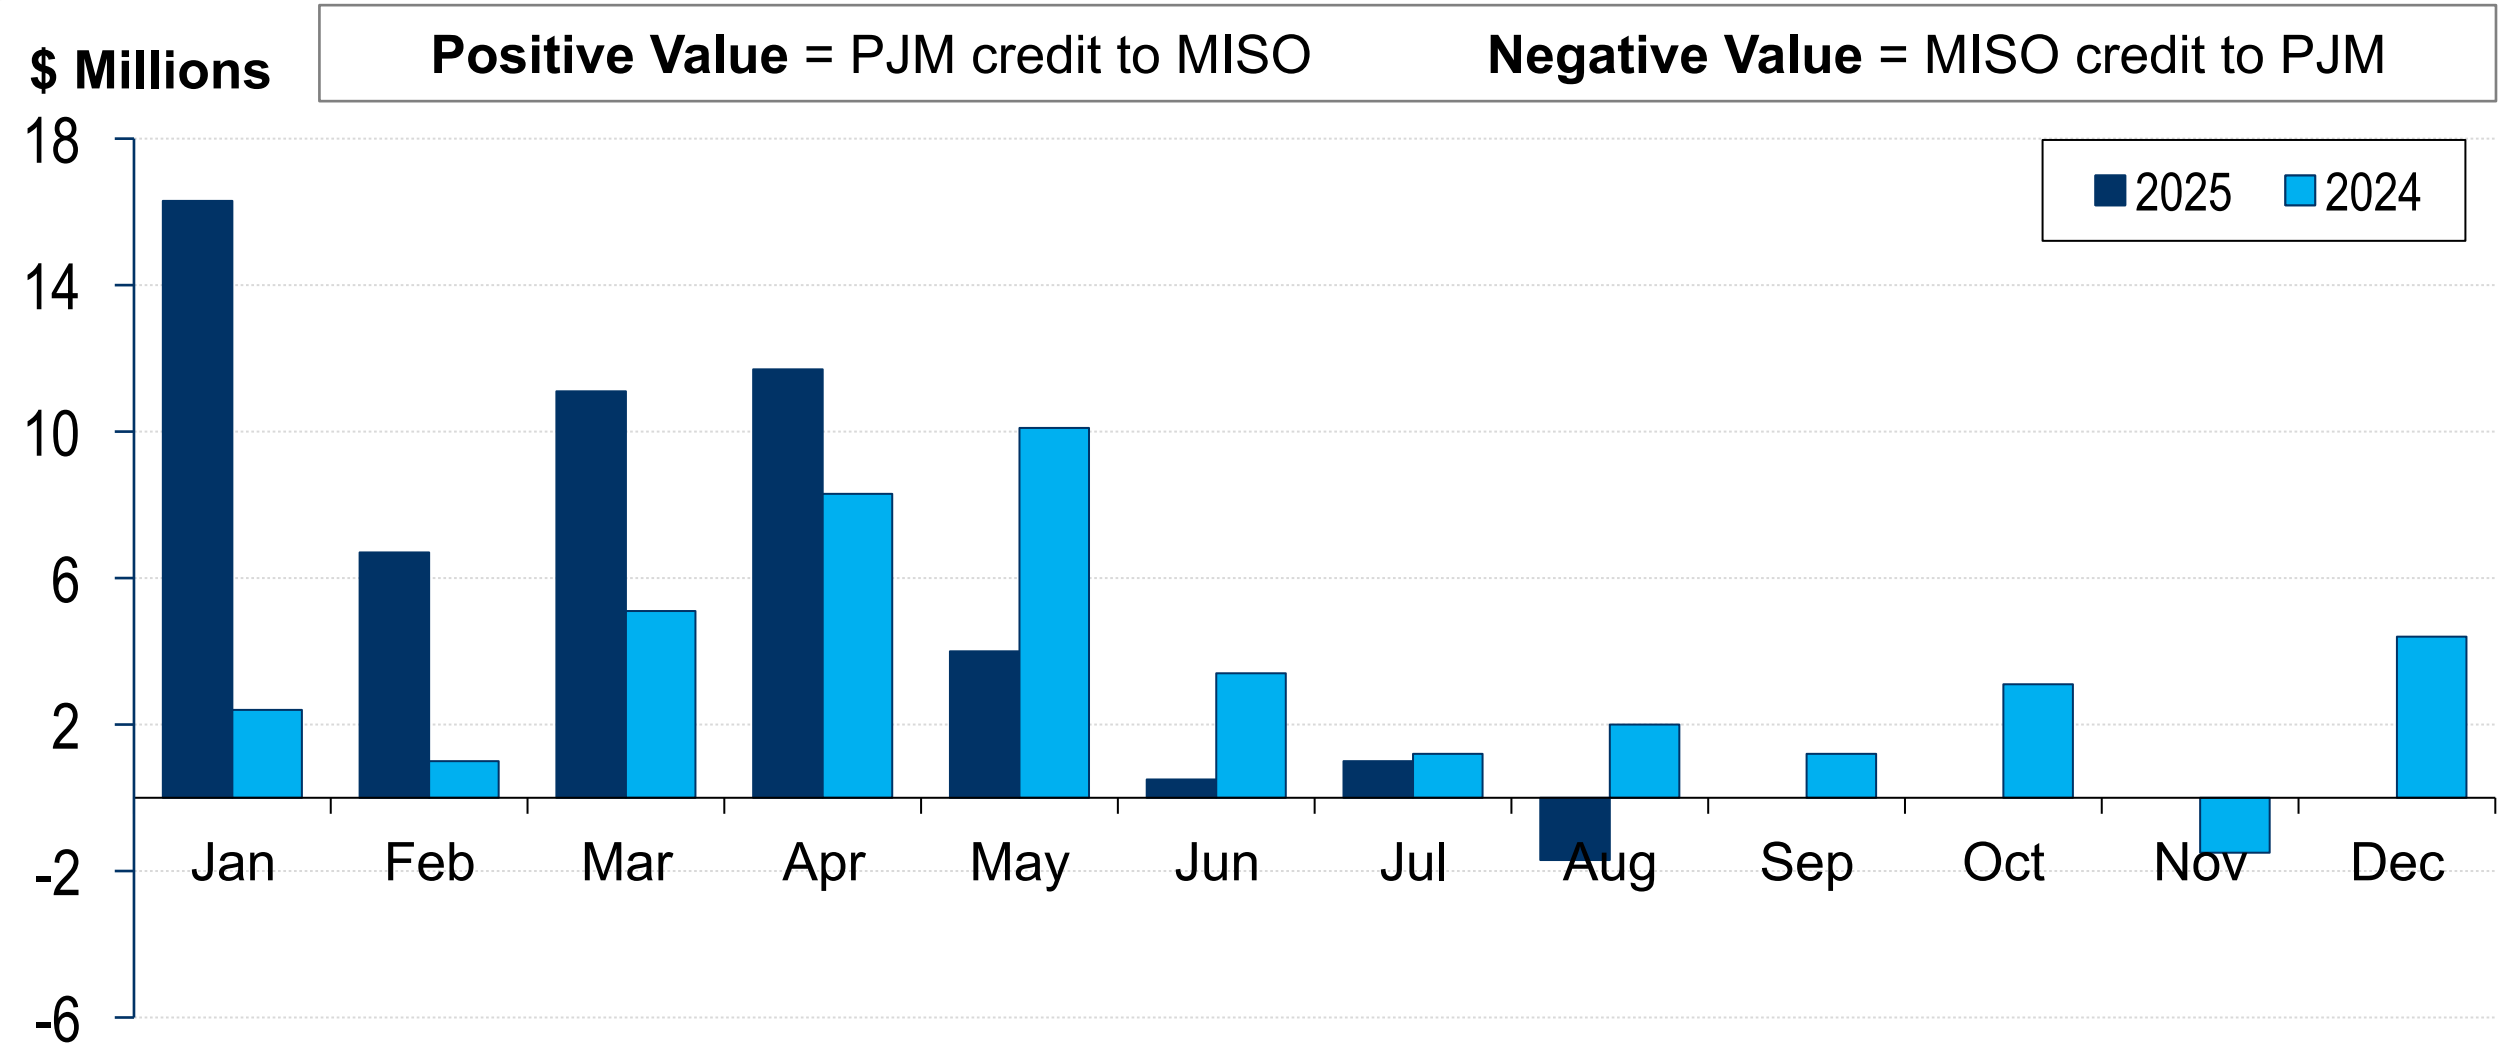

FERC Order 881 Impacts to Flowgate Allocation

Review Current Transmission Upgrade Study Process

Market-to-Market Metrics based on Joint Operating Agreements

M2M Coordination with MISO

M2M Coordination & PAR Coordination

YTD NYISO PAR Coordination Credit

Positive Value = PJM credit to NYISO

Negative Value = NYISO credit to PJM

- PJM and TVA coordinating on Joint Emergency Energy Agreement
 - Last meeting held on Aug 21st with TVA
 - Follow up with AEP and EKPC expected by mid September
 - Goal to have agreement in place no later than 12/31/2025

Feb. 7, 2025 – Most recent Joint and Common Market meeting was held.

Sep. 12, 2025 – Next joint stakeholder meeting will be hosted by PJM via WebEx.

Meeting materials are posted approximately one week in advance on the **PJM Meeting Center:** [PJM – PJM/MISO Joint & Common Market Initiative.](#)

Appendix

CMPC requested the CMPWG to review principles and the usage of PFV as an alternative to Freeze Date.

CMPC understands the urgency of the Freeze Date solution.

- PFV is an Eastern Interconnect agreed solution that improves the wide area view of RCs and equips them to assign relief obligations during periods of congestion that are more representative of those contributing to congestion.
- Uses Generation to Load (GTL) Flow Concept for all BAs, replacing the previous used Network and Native Load (NNL) Flow relief obligation and Market Flow construct
- GTL Priorities – GTL incorporates new methods to establish transmission priority of a generator. (established under v3.3 of the NAESB WEQ-008 TLR standard)
- **Specifically looking to leverage the Generator Prioritization Method and associated Generator Prioritization Schedules (GPS) to establish Firm Market Flow entitlements for use in M2M settlements vs the Freeze Date method.**
- The GPS data submission to the IDC is required of the RTO/ISO (i.e. all the market entities have designated this methodology under the NAESB standard)

The IDC PFV engine already calculates real time firm and non-firm right values based on the GPS method for market entities.

Aligns entities with Industry Standard NAESB WEQ-008 version 3.3

Reduces complexity of processes by utilizing real time data.
