MRC 1st read date:	March 19, 2025 (same day 1 st read/endorsement)
MRC voting date:	March 19, 2025 (same day 1 st read/endorsement)
Impacted Manual sections: Section 1.2.5 Surplus Project Developer Section 12 Surplus Interconnection Service	
Reason for change: M14H revisions needed to conform the manual to OATT revisions related to Surplus Interconnection Service, per FERC Docket No. ER25-778.	
Summary of the changes:	

Executive Summary Manual Changes

- Eliminate restrictions on Surplus service when 1) the service would affect the determination of Network Upgrades for projects already in the interconnection process or 2) result in material adverse impacts on short circuit capability limits, steady-state thermal and voltage limits, or dynamic system stability and response
- Changes to allow Project Developers to apply for Surplus Interconnection Service from **planned** as well as **existing** generating facilities
- Changes to permit Surplus Interconnection Service even in circumstances in which additional physical interconnection facilities are needed to accommodate that service
- Clarifying edits and corrections were also made
