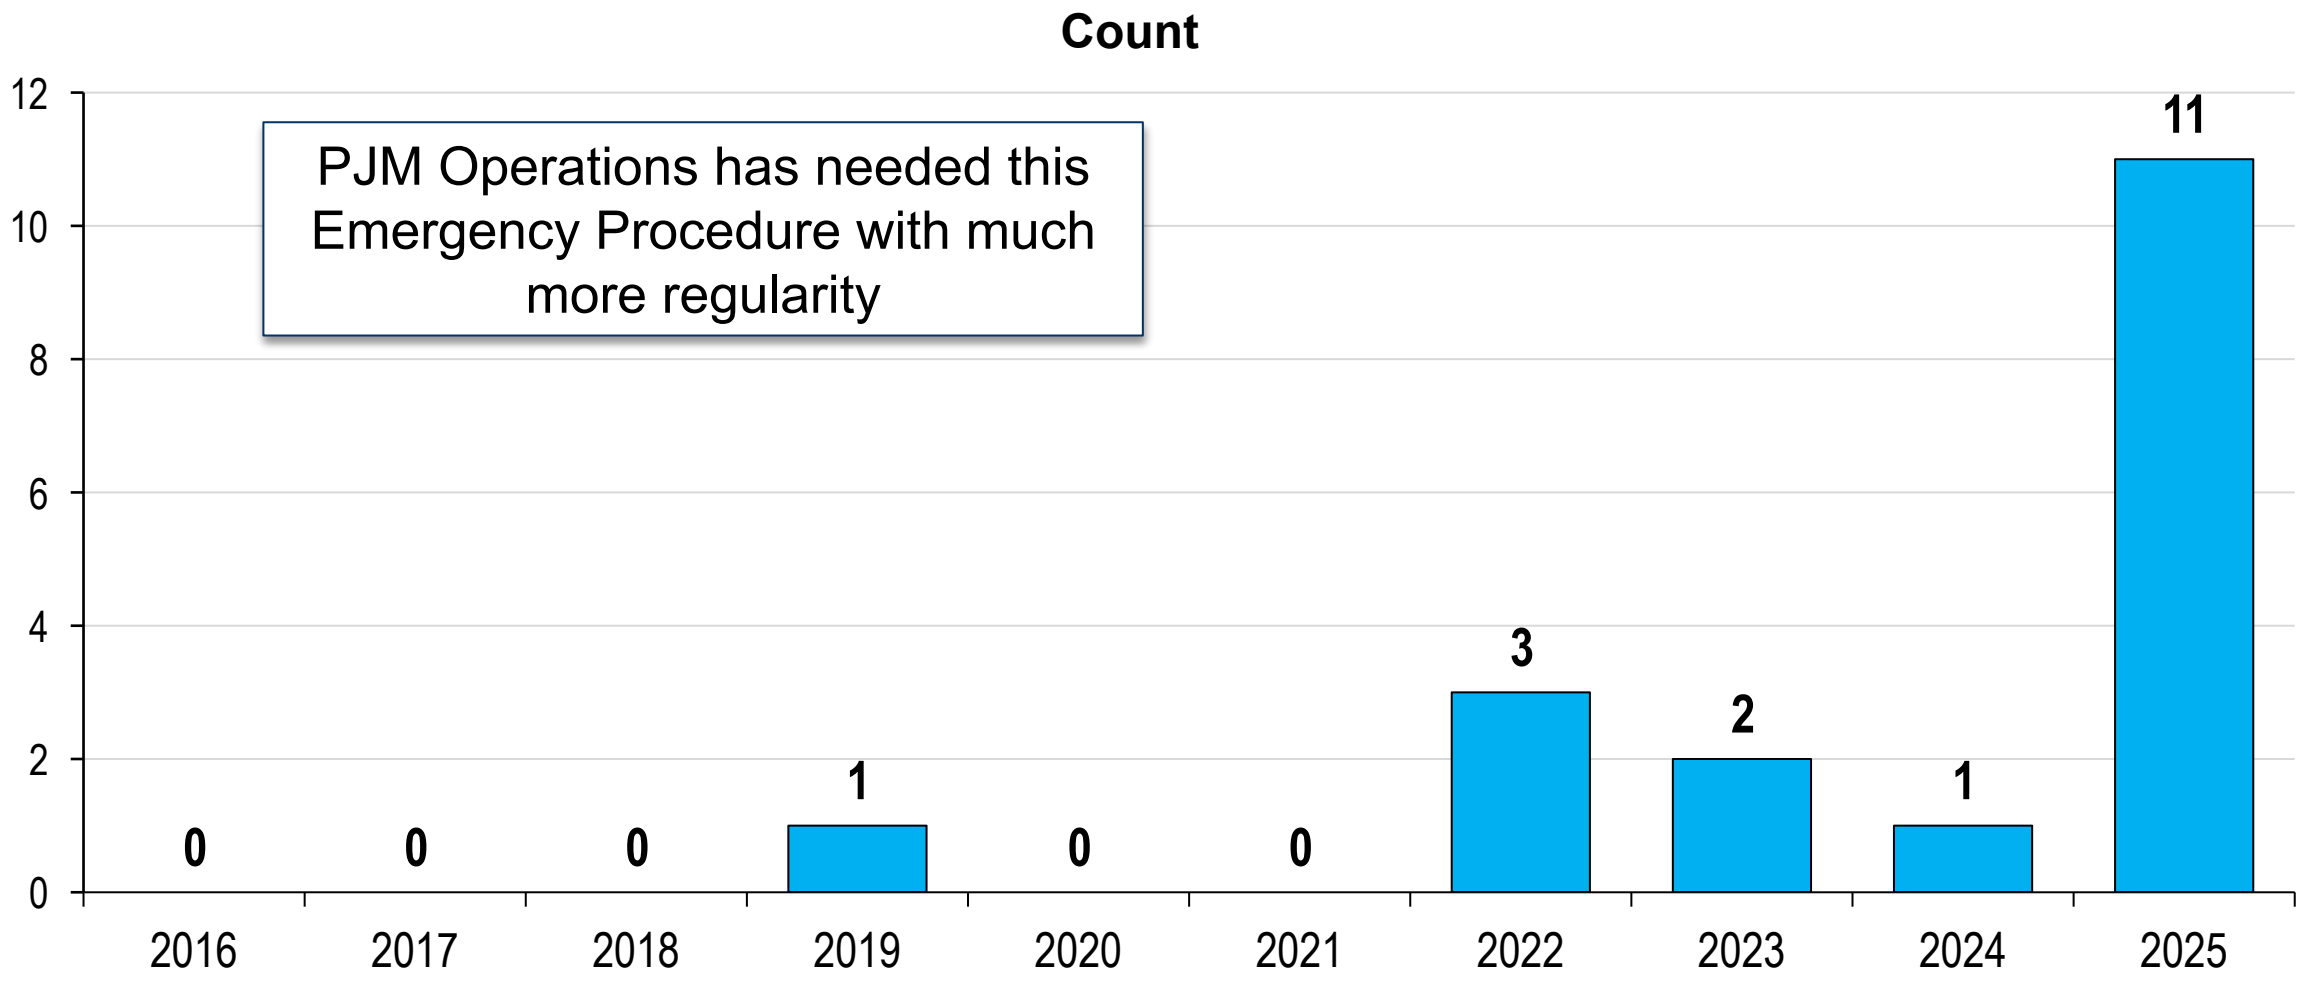
EEA-1 Declarations by Year



PJM©2025

M–14H Section 4.10.1

- M-14H section 4.10.1 “Interim Deliverability Studies” added additional language that will allow for the additional possibility for energy-only operation under certain conditions prior to the required network upgrades for the new interconnection generation is completed.

M–14H Section 4.10.1

- 4.10.1.2 “Schedule for Interim Deliverability Studies” edited:
  - “Requests for interim deliverability studies for a particular delivery year shall be made a minimum of ~~ten~~ eleven months prior to the start of that delivery year.”
- 4.10.1.3 “Analysis for Interim Deliverability Studies” added:
  - At PJM’s discretion, PJM may allow Provisional Interconnection Service for projects with Contingent Facilities to operate as energy-only resources for a particular Delivery Year. During such periods, PJM reserves the right to deny Provisional Interconnection Service for projects or to limit total injections for projects consistent with the results of the interim deliverability study (which may be less than the Maximum Facility Output).
  - The interim deliverability study shall include any additional studies necessary to evaluate a New Services Requests eligibility for Provisional Interconnection Service.

M–14H Section 4.10.1

- 4.10.1.3 “Analysis for Interim Deliverability Studies” note added:
  - Even if a project is found to be deliverable or granted Provisional Interconnection Service for a particular delivery year, interim deliverability must be requested for each additional Delivery Year that the conditions apply. An energy-only resource is eligible for Provisional Interconnection Service but not awarded Capacity Interconnection Rights.

M–14H Section 4.10.1

- 4.10.1 changes throughout:
  - Additional cleanup to the existing language such as:
    - Inclusion of ISA as applicable
    - Capitalizing terms
    - Usage of correct defined terms
    - Grammatical corrections

2026/27 Delivery Year Interim Deliverability Study

- PJM has received all applications for the 2026/27 Delivery Year Interim Deliverability Study. At this time, due to the proposed revisions to Manual 14H, no action is required from developers who submitted requests. However, once the final Interim Deliverability Study language in Manual 14H is approved, PJM will review any impacts and, if needed, will directly contact affected developers to coordinate next steps.

Legal References

- Under Order No. 845, FERC required transmission providers to allow interconnection customers to request provisional interconnection service and operate under provisional interconnection agreements based on a readily available interconnection study and additional studies, as necessary. (*See* Order No. 845, 163 FERC ¶ 61,043 at PP 438 & 441 (2018))
- In PJM's Order No. 845 compliance proceeding, PJM explained that it would use interim deliverability studies to evaluate requests for provisional interconnection service. (*See PJM Interconnection*, L.L.C., 169 FERC ¶ 61,226 at P 83 (2019))
- The *pro forma* GIA's "provisional interconnection service" provision does not limit PJM to using interim deliverability studies to evaluate requests for Provisional Interconnection Service; it also gives PJM discretion to evaluate such requests using "additional studies as necessary." (Tariff, Part IX, Subpart B, Appendix 2, section 1.4A.2)
- The Tariff, Part VII and VIII definition of "Provisional Interconnection Service" includes both capacity and energy. (Tariff, Parts VII and VIII, Definitions)
