- Section 3.9.1

3.9.1 Process for Handling Generator Stability Limitations

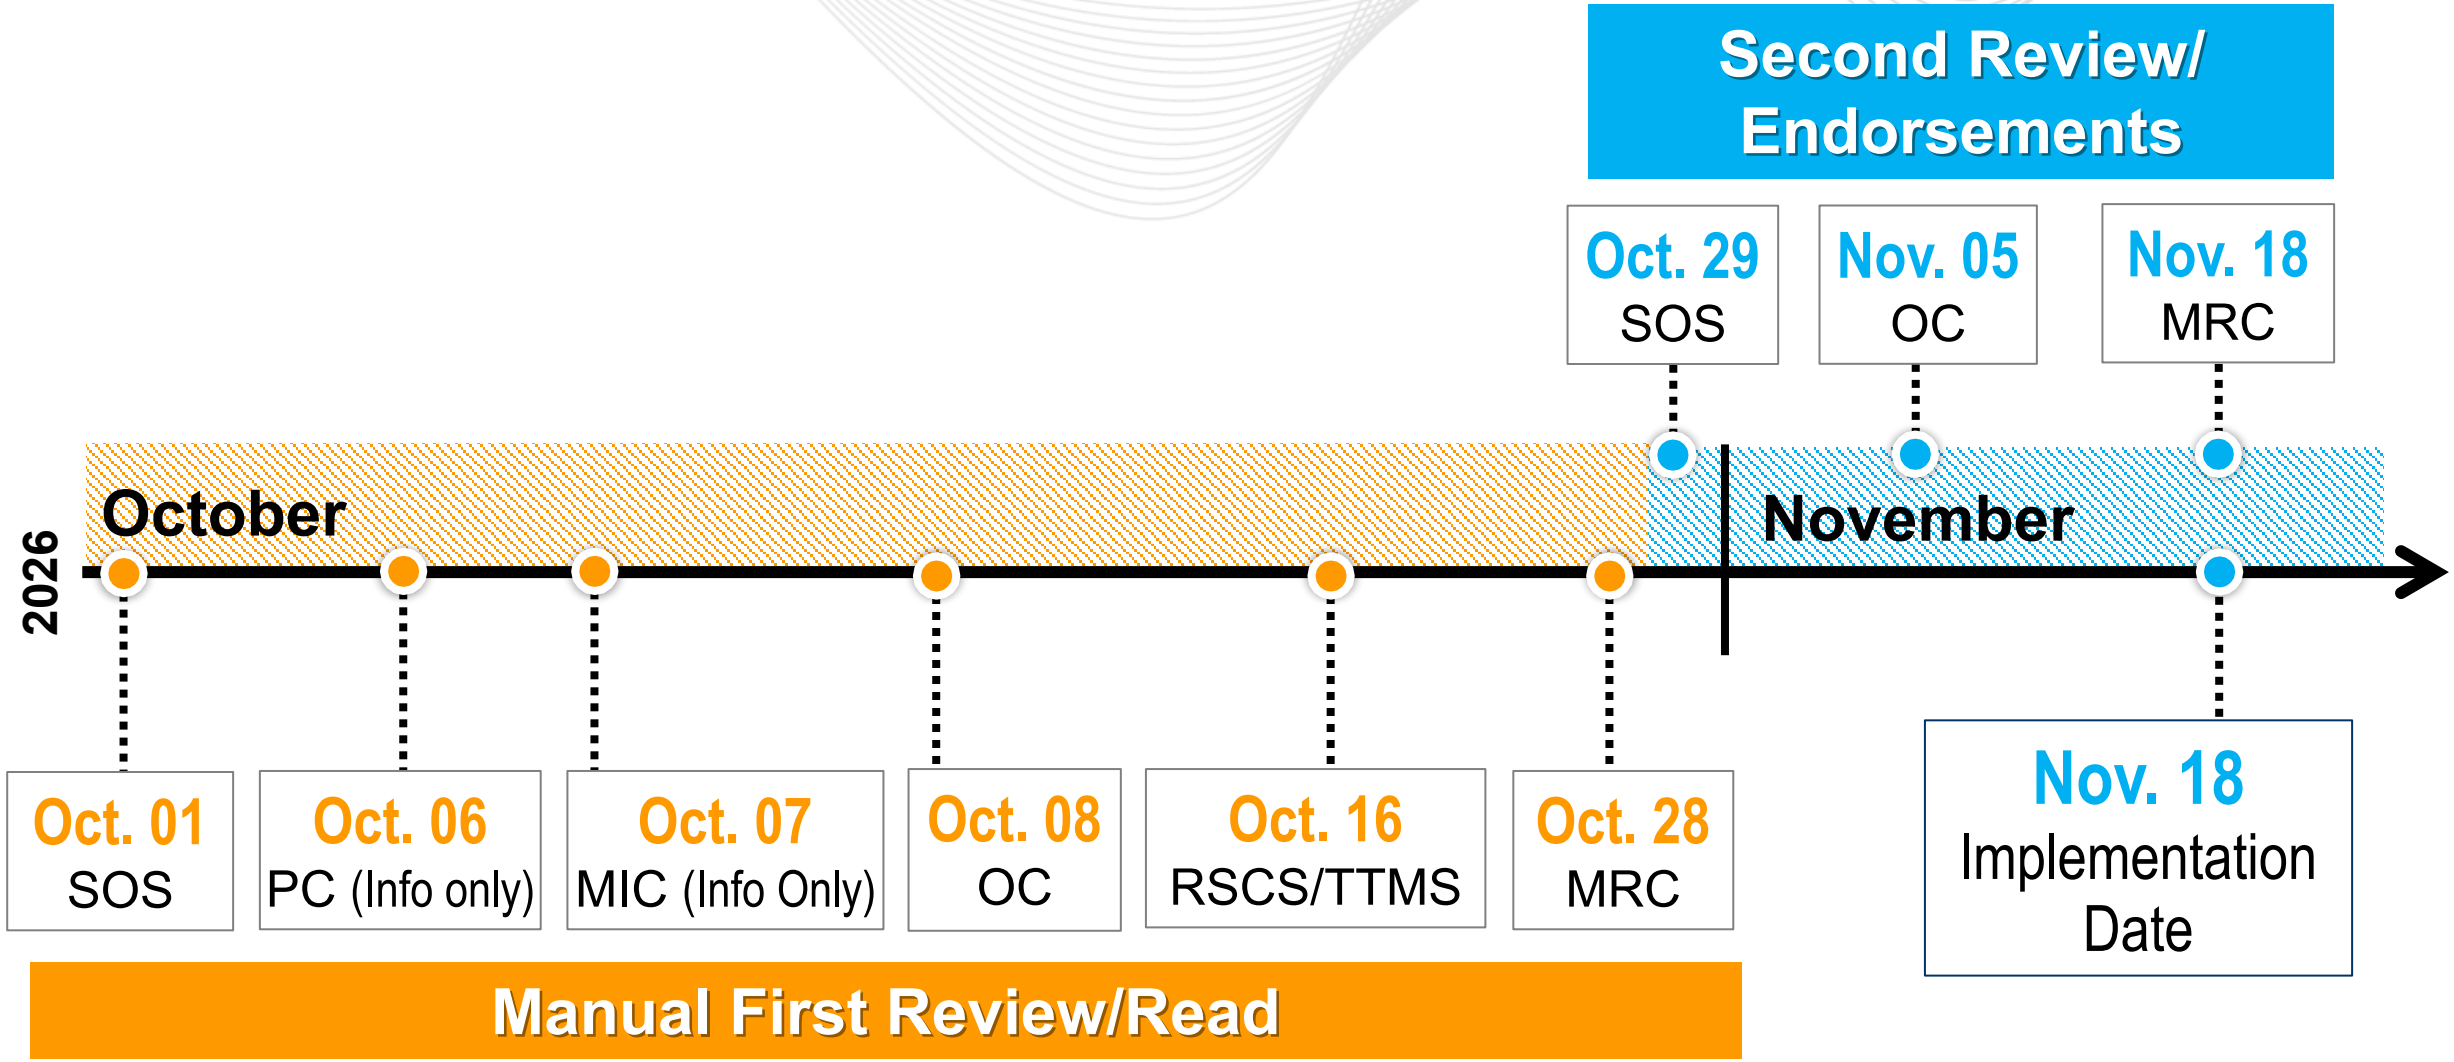

When stability issues are identified, PJM will:

- Confirm/calculate the stability limitation and communicate the impacted unit(s) and associated limit value(s) as a Stability Limit, including the effective timeframe, to the impacted ~~PJM generation owner(s)~~Market Operations Center (MOC) as quickly as possible and prior to DA market submission when practical.
  - This includes any changes, including cancelation, around a given stability limit.

  - o PJM will notify the Transmission Owner of Reactive power (MVAR) limitations as quickly as possible. A Real Power (MW) limitation and Maximum units online may also be communicated.
