

Projected TO DLR Facilities List [as of 2/4/2026]

See PJM's Transmission Operations manual, [M-03](#), Section 2.1.1.2, revision 66 and beyond for timing and notice requirements around PJM Transmission Owner Dynamic Line Ratings [DLR]. *Update Required By* indicates a date to extend implementation further into the subsequent cycle.

New DLR and Questions/Inquiries: DynamicLineRatingsTm@pjm.com

Updates should be provided through the PJM Operating Committee [Chair/Secretary](#) as soon as a change is identified to the Go-Live schedule.

PJM Transmission Operations manual, [M-03](#), Section 2.1.1.2, DLR Notice Requirement

Note:

DLR Notice Requirement:

In order to assure the readiness of PJM market and operations systems for any facility moving to the use of DLR, PJM requires notification in alignment with the rules in place for Transmission Outages exceeding 30 calendar days in duration (See M-03, [Transmission] Outage Submittal Rules, Section 4.2.1). Notice and updates must be made to the PJM Operations Committee stakeholder meeting per the following deadlines:

- Before February 1 (for the following planning cycle, June 1 – May 31) OR by the 1st of the month six months in advance of the installation and use within the Operations time horizon, whichever is more restrictive. (i.e., notice for a facility moving to DLR in June of an upcoming year would have to be presented before December 1st.)
- A running Informational Only Postings update of upcoming DLR installations, with projected DLR installation information updated as necessary from the respective owners, shall be tracked as part of the PJM Operating Committee stakeholder meetings.

¹ To encourage advanced notification, if the TO provides early notice of a Go-live implementation schedule which is later than the *Earliest* available associated with their announcement, then the implementation period and associated update schedule would be extended to the latest Implementation period that would meet their go-live rather than that associated with the Announcement timeframe.
